

International Conference on Trustworthy AI and Intelligent IoT Systems (TAIIS 2026)

INNOVATION | SECURITY | SUSTAINABILITY | SMARTER TOMORROW

Building Intelligent Systems for a Secure, Sustainable and Inclusive Future

SPECIAL SESSION SS1

Special session on Trustworthy and Explainable AI for Intelligent IoT Systems

Paper Submission Deadline
September 30, 2026

Conference Dates
December 3–5, 2026

Taichung, Taiwan · Asia University

SESSION FOCUS

CHAIR

Agung Mulyo Widodo — Esa Unggul University, Indonesia

LIST OF TOPICS

- Explainable AI (XAI) for streaming and edge IoT analytics
- Trust metrics, assurance cases, and conformity evidence for IoT ML
- Uncertainty calibration and out-of-distribution detection on sensor networks
- Fairness, bias auditing, and ethical constraints in IoT AI
- Human-in-the-loop validation and operator-centric explanations
- Verifiable, auditable ML pipelines across edge–cloud IoT stacks
- Trustworthy federated and split learning on device populations
- Visualization and narrative interfaces for IoT control centers
- Regulatory alignment (AI Act, medical devices, critical infrastructure)
- Benchmarks, datasets, and reproducibility for trustworthy IoT intelligence

PUBLICATION

Springer

Peer-reviewed papers will be published in Springer's Lecture Notes in Electrical Engineering (LNEE) series.

INDEXING

Scopus

Proceedings will be submitted for indexing in Scopus and Ei Compendex.
