

International Conference on Trustworthy AI and Intelligent IoT Systems (TAIIS 2026)

SS2:

Special session on AI-Driven Cybersecurity and Privacy for IoT and Edge Networks

INNOVATION | SECURITY | SUSTAINABILITY | SMARTER TOMORROW

SESSION CHAIR

Arcangelo Castiglione

University of Salerno, Fisciano, Salerno, Italy

Building Intelligent Systems for a Secure, Sustainable and Inclusive Future

Taiwan — A Hub for Global Ideas

Paper Submission Deadline
September 30, 2026

Conference Dates
December 3–5, 2026

Taichung, Taiwan

LIST OF TOPICS

- AI-based intrusion detection and anomaly analytics for IoT/edge
- Differential privacy, secure aggregation, and federated security analytics
- Zero-trust networking and micro-segmentation for IoT
- Blockchain and distributed trust for IoT supply chains
- OT/IT converged security orchestration
- Threat intelligence fusion, SOAR, and automated response
- Adversarial attacks and robust defenses on edge ML models
- Device identity, attestation, and firmware integrity monitoring
- Lightweight cryptography and post-quantum readiness at the edge
- Benchmarks, datasets, and red-team methodologies for IoT security

Publication

It is planned to publish the peer reviewed and selected papers of the conference in the prestigious Lecture Notes in Electrical Engineering series by Springer.

Indexing

The conference proceedings will be submitted for indexing in Scopus and Ei Compex.
